Post Occupancy Evaluation (POE) of Library Buildings is an essential process that assesses how well a library space functions after it has been occupied and used by its patrons. This systematic review provides valuable insights into the effectiveness of the design, functionality, and user satisfaction, ultimately guiding future improvements and informing best practices in library architecture and management. Conducting a thorough POE ensures that libraries remain responsive to the evolving needs of users, support their academic and community missions, and maximize investment returns.

What Is Post Occupancy Evaluation (POE)?

Post Occupancy Evaluation is a structured process used to gather feedback from users and assess the performance of a building after it has been occupied. In the context of libraries, POE examines aspects such as spatial layout, environmental comfort, accessibility, technological integration, and overall user experience. Unlike pre-design planning or construction assessments, POE focuses on real-world use, capturing insights that might not be evident during the design phase.

Why Is POE Important for Library Buildings?

- **User-Centric Improvements:** Libraries serve diverse user groups, including students, researchers, community members, and staff. POE helps identify which spaces meet their needs and where adjustments are necessary.
- **Operational Efficiency:** Evaluation can reveal inefficiencies in space utilization, resource allocation, and facility management.
- **Design Validation:** It assesses whether the initial design intentions translate into functional, comfortable, and accessible environments.
- **Sustainability and Maintenance:** POE can highlight issues related to environmental controls, energy use, and maintenance challenges.
- **Future Planning:** Findings inform strategic planning, renovations, and the development of new library facilities.
